

ids - l'industria del serramento 2008 editorial plan

ids - L'industria del serramento is a publication for industrial and handcraft door and window manufacturers, joiners and, in general, all companies dealing with wood and composite materials for home installations.

The magazine's mission is to support information and technological update in an industry that is growing strong in terms of design and technology. The technology topics will include machines and tools, lines for production, finishing, assembling, glazing, hardware inserting and packaging. The featured categories of components will be wood and wood-based raw materials, composite materials, hardware and seals, glues and paints, glass and packaging materials.

Subjects and fair distribution for ids - L'industria del serramento in 2008 will be organized as follows:

gennaio febbraio marzo

Certification as a topical issue: Catas in action, technology focus on **hardware handling and inserting**.

Wooden staircases: culture of living and high technology.

This issue will be distributed at **MADE EXPO** in Milan and **SAIESPRING** in Bologna.

aprile maggio giugno

The Focus will be on **machining centers or lines**. When and why? Decorative hardware for doors and windows. External windows and their production problems. This issue will be distributed at **XYLEXPO** in Milan.

luglio agosto settembre

The issue focus will be **nanotechnology in window and frame painting**: the results of a year of technical tests and practical applications. Much space will be dedicated to **tools** for windows. Another subject will be **design and rendering technology** for doors and windows. This issue will be distributed at **SAIE** in Bologna and **Teknologno** in Lanciano.

ottobre novembre dicembre

The issue focus will be: **assembling windows and frames, manual skills and automation**. A section will be dedicated to glazing and its technological developments. Also sliding systems for **windows** will be presented. This issue will be distributed at **DOMUS LEGNO** in Rimini and **EXPOEDILIZIA** in Rome.

ids - L'industria del serramento regularly collaborates with **CATAS** and **FAUCIGLIETTI ENGINEERING**.
